

# Building A Restaurant Website with Bootstrap.

## Writeup

### DESCRIPTION

#### Project objective:

Build a responsive website for a restaurant where users can read the details of the restaurant.'

#### Background of the problem statement:

You are a web developer at a service-based web development company called Kite Technologies. The company has been approached by a client who wants to build a website for their restaurant named Ming's Diner. The website should provide the users a brief overview of the restaurant and its bestsellers, its address, as well as an option to contact the restaurant. During sprint planning, you agree to lead this project and develop the website.

#### Responsibilities:

- HTML5: To define the content of the website and the whole structure.
- Bootstrap5: To build the website for the designs and User Interface.
- JavaScript: To handle events and responses.
- JQuery: To include JavaScript plugins like modals, tooltips, etc.

#### Tools:

- HTML5:
- Bootstrap5
- JavaScript
- JQuery

**Features:**

- The website is fully responsive, as per the screen size it adjusts automatically.
- In the home page of the website, there is Carousal have been used for the sliders, Navbar for the nav menus and tabs along with drop down menu. Buttons, Grid and Footers have been used.
- The website has a Contact Us form, with an action of post to redirect the user to the Thankyou page after clicking the submit button.
