

# Automate the Web Application.

## Writeup

### DESCRIPTION

#### **Project objective:**

Use the website link given to you and automate different functionalities for the same. Create a new project and include all the dependencies in the class path. Create a Java class that will contain your automation and test scripts. Run the project using TestNG.

#### **The following used:**

- Eclipse as the IDE
- TestNG
- Selenium WebDriver

#### **Following requirements should be met:**

- Show a registration form, login, search bar, and add-to-cart automation
- Handle invalid logins and show appropriate error messages in the console

- Fetch the test reports over HTML or Excel
- Document the step-by-step process involved in completing this task
